Workshop Title:

Mastering Anterior and Posterior Composites: From Bonding to Polishing

Abstract:

This hands-on workshop is designed to enhance clinical confidence and skill in aesthetic and functional composite restorations. Focusing on both anterior and posterior teeth, the session will cover essential techniques including effective bonding protocols, strategic layering methods, use of sectional matrix systems, sculpting and moulding for natural anatomy, and advanced polishing for long-lasting luster. Participants will gain practical insights and tips that can be immediately applied in everyday practice, helping them achieve predictable, high-quality outcomes in direct composite restorations.
