Title: Mastering Posterior Indirect Restorations: A hands-on Workshop with Digital Workflow

In Modern dentistry, mastering posterior indirect restorations is crucial for achieving long-lasting and aesthetically pleasing results. With the advent of digital technologies, workflows have evolved, offering dentists greater precision efficiency, and patient satisfaction. This hands-on workshop is designed to equip participants with the knowledge and skills to excel in posterior indirect restorations using a digital workflow.

Learning Objectives:

1. Understand the principles of posterior indirect restorations.
2. Familiarize participants with digital tools and technologies for restorative dentistry.
3. Learn step -by-step digital workflow for posterior indirect restorations.
4. Develop proficiency in designing and fabricating posterior restorations using CAD/CAM systems.
5. Enhance knowledge of materials selection and bonding techniques for optimal clinical outcomes.
6. Discuss troubleshooting and tips for successful posterior indirect restorations.

This hands-on workshop offers a comprehensive learning experience for mastering posterior indirect restorations with a digital workflow. By combining theoretical knowledge with practical skills, participants will gain confidence in utilizing digital technologies to deliver superior outcomes for their patients.

Date: 05-02-2026
