Venue:
Father Muller Convention Center,
Mangaluru

HOSTED BY IDA DK BRANCH

Pre - Conference Course 6

Dr. Moez Khakiani

Full Mouth Reconstructions Made Achievable: From Principles to Practice

Full Mouth Reconstruction (FMR) has always been viewed as one of the most complex and intimidating aspects of restorative dentistry. This pre-conference course aims to simplify the subject by providing participants with a clear, structured, and clinically relevant approach to planning and executing tooth-supported full mouth rehabilitation.

Through this program, participants will learn:

- The Need for Full Mouth Reconstruction – when and why to consider comprehensive rehabilitation.
- Stepwise Clinical Process – how to break down a complex case into simple, achievable stages.
- Material Options – choosing the right restorative material for predictable and aesthetic outcomes.
- Fundamentals of Occlusion – determining centric relation, establishing vertical dimension, and selecting an appropriate occlusal scheme.
- Aercare Protocols – ensuring long-term success and patient compliance post-rehabilitation.

In addition to the didactic component, the course will feature a live patient demonstration showcasing steps in recording of a facebow and transferring to a semi-adjustable articulator. With a blend of systematic teaching and live demonstrations, the pre-conference workshop offers a comprehensive learning experience for dentists who want to strengthen their confidence in handling tooth supported full mouth rehabilitation cases.

Date: 05-02-2026

No. of Slots: 20 (Workshop) & 100 (Pre-conference Lecture)

Course Fee: Rs: 5000/- (For Lecture & Workshop)

Rs: 500/- (For Lecture Only)
